

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

PREFACE.

DAVID ZEISBERGER was born at Zeuchtenthal, Moravia, April 11, 1721. He began his labors as a missionary in this country in 1740 and continued them uninterruptedly for more than sixty years. He died in 1808 at Goshen, in the valley of the Tuscarawas, Ohio. His manuscripts of the Onondaga and Delaware Dictionary, and some Delaware vocabularies, with some printed Indian works, together with other manuscripts of Indian material, were obtained by Judge Ebenezer Lane, of Ohio, and presented by him to Harvard College, of which the jurist was an alumnus.

I found the manuscript of the Dictionary among the treasures of the College Library. My interest in it grew, primarily, out of the wish to learn the meanings of the Indian names of localities in New England and the neighboring States. Mr. Winsor, the librarian, kindly gave me permission to have the manuscript copied, and every facility for the subsequent study of the original text, side by side with my copy, in the correction of the proof-sheets.

Parts of the Delaware definitions, more especially of the earlier and later pages of the manuscript, are not in Zeisberger's handwriting; and it is inferred that these portions were not written from dictation, as the letters chosen for particular sounds are unlike those uniformly employed by the missionary for the same sounds. The columns of English words to be defined and their German equivalents, together with all the Onondaga definitions, and perhaps more than half of the Delaware definitions, are in

the penmanship of Zeisberger, as I have satisfied myself by comparison with one of his original letters written to his brother. Zeisberger's Delaware was of the Minsi dialect. There is no titlepage to the manuscript.

It was no part of my purpose to edit such a work. My supreme wish was to render it impossible that such precious result of the labor of a lifetime, in the midst of the rarest opportunities, — impossible ever again to occur, should by any accident hereafter be wholly lost.

I have not ventured upon the task of altering, or restoring, or filling out, in any instance. I have only here and there, where long study and the microscope and kindred writing have left me in doubt, given expression to the doubt. Where a blot, or hopelessly obscure manuscript, or obliteration, or abraded paper had made deciphering impossible, I have noted it. Every period and comma and accent have been transferred without question to the printed page. Where there was a blank, and uniformity required a period or a comma, the blank has been respected.

Where a comm. should have been replaced by a period, or vice versa, the discovery has been left to the student as much as if he had the original manuscript before him. It has sometimes been impossible to distinguish between an accent and an apostrophe.

In a few instances only it became necessary to make new type, — where a dot and an accent were to be combined. I add some observations that may be of service to persons resorting to the Dictionary.

'Am and 'Ancle are printed with apostrophes. This form of accent or indication of abbreviation occurs with a few English words beginning with a capital A.

On page 114 the F. refers to the same character below, which in the MS. comes at the foot of the page and seems to be a note.

The MS. was paged after it was bound, and in three places the leaves were transposed, as is shown by the alphabetical arrangement.

The pages 67 and 68 should follow 69 and 70 (using the MS. paging). The order has been restored in the printed pages.

Page 127 should follow 128.

PREFACE. v

Pages 302 to 308 of the MS. should have been bound in this order: 302, 304, 303, 307, 308, 305, 306. The words on pages 304, 303, 307, and 308, are nearly duplicated on 305 and 306.

it. seems to be an abbreviation of ita as it is used on pages 128, 169, 203, and elsewhere.

A colon (:) is used after an abbreviation; as, sch: (for schungara, one, somebody) and st: (for stenschoh, something); also, j: for jachte, the Onondaga negative.

The letters c and e have been very hard to distinguish; when to use c would have brought three consonants together, the middle letter has been printed e.

The ditto marks have been followed as exactly as possible. On account of the inequalities in the lengths of the lines in both the printed and written pages, it has often been necessary, in order to avoid confusion and retain the meaning, to repeat the words, instead of using the ditto marks as in the MS.

My aim has been to preserve the Dictionary of the venerated Moravian missionary precisely as he left it, with its somewhat eccentric English and somewhat antiquated German,—now and then written when possibly he was greatly fatigued, now and then perhaps without a maximum of care, now and then with the aid of a friendly hand,—copying always, as nearly as the type would permit, the manuscript as it came into my possession.

To accomplish this, my own eyes would alone have been inadequate. Fortunately I secured to assist me in revision, and in the verification of my first copy (with the original manuscript at hand for comparison at every step), and for assistance in the study and correction of the proof-sheets, Miss Bertha Hortense Merrill, of Cambridge, to whom it is a pleasure and a duty to acknowledge my indebtedness.

EBEN NORTON HORSFORD.

CAMBRIDGE, 1887.
